Advancis receives LenelS2 Factory Certification under LenelS2 OpenAccess Alliance Program

WinGuard from Advancis interfaces with LenelS2's OnGuard access control security system

Langen, 15. März 2022 – Advancis Software & Services GmbH today announced that it has received LenelS2 factory certification and joined the LenelS2 OpenAccess Alliance Program (OAAP). WinGuard from Advancis interfaces with the OnGuard® access control system. The integration allows the LenelS2 OnGuard access control system to be managed directly from WinGuard equipped control rooms.

“Advancis has completed required factory testing at LenelS2 to validate the functionality of its interface to the OnGuard system. WinGuard (SOPs) augments the OnGuard systems situational awareness capabilities with more dynamic workflows so that the user has an enhanced ability to manage alarms and situations,” said John Marchioli, OAAP Product Management, LenelS2. “We look forward to their continued involvement in the LenelS2 OpenAccess Alliance Program.”

“We have now received LenelS2 factory certification for the seamless integration of the OnGuard access control system versions 7.6 and 8.0 into the open PSIM platform WinGuard which allows us to benefit from the LenelS2 OAAP program”, stated David Teppe, Head of Strategic Alliances at Advancis.

WinGuard from Advancis is an open PSIM platform that unifies control of disparate security, building management and communication systems via one single user interface. This includes video surveillance, fire alarm, access control, intrusion detection, perimeter protection, building automation, communication systems and much more.
